

1.	Include section corner tie-in if the project did not have a Location Control Route Survey Plat.	
2.	Note the section corners, section lines and quarter-section lines.	
3.	Note the property owners and show the apparent property lines, but do not label them as such. Include all properties impacted by the proposed construction.	
4.	Include the name of stream, river, etc. and direction of flow.	
5.	Note civil township; and section, township and range; and county.	
6.	Note the stations in 100-m increments.	
7.	Show and label all right-of-way lines. Station and offset for R/W points should not be shown.	
8.	Show and label all temporary right-of-way. The purpose for temporary right-of-way need not be specified.	
9.	Note line designation of project centerline and all S-lines. Show centerlines from which new R/W is described.	
10.	Note the station and location of project beginning and end.	
11.	Include and label all equations.	
12.	Show all applicable subdivision names and lot numbers.	
13.	Include the north arrow.	
14.	Include the scale used on drawings.	
15.	Show and label existing roads.	
16.	Hatch landlocked residues.	
17.	Place hexagons around numbers used for property owner legend/index.	

CHECK LIST FOR PLAT NO. 1
